

IWSP BIWEEKLY LOGS

Name:	ONG JIA EN, DARRYL	IWSP Period [Start date – End date]:	01/09/25 – 10/04/26
Student ID:	2301402	Log Period:	Trimester 1/ Week 1&2
Company:	WizVision Pte. Ltd		

Provide concise 1-2 lines for each of the sections highlighted in **yellow** below (**do not exceed 1 page**)

Situation

The first two weeks was mainly spent on onboarding, technical training and initial project familiarisation. The purpose was to equip interns with essential tools, knowledge and practices to contribute effectively to ongoing company projects. I was only assigned to my project team 10/09, the 8th day of internship as the onboarding/training was 8 days long.

Task(s) and Action(s)

- Completed onboarding, IT setup and mandatory security awareness training
- Attended micro-trainings covering software tools, development practices and solution architecture
- Practiced on labs using Java, .NET, SQL, Docker, Git and Node.js to build foundational technical skills
- Assigned to my project team and began familiarizing with the codebase
- Worked on a Change Request (CR) assigned to me which involves the splitting of a batch job with multiple levels to 4 separate batch jobs for each level

Result(s) and Learning(s)

- Refreshed my knowledge on the various technologies
- Gained exposure to different development frameworks and deployment practices
- Improved understanding of software engineering workflows such as SIT/UAT processes
- Understood the importance of scalability, security and maintainability in solution architecture
- Built confidence in navigating complex codebases and gradually contributing to production-level tasks

Academic Supervisor Feedback

(To be left empty for first submission)

☒ I acknowledge that I have got approval from my Industry supervisor before submitting the logs and there is no sensitive information in this log.
